50X1-HUM

CONFIDENTIAL ONLY

8. Soviet soldiers were constructing a fuel dump, about 150 moters square, at km-stone 3.0 on the northern edge of the road to Burg. \*\*\*A wooden fence was being erected. About 11 containers were seen. Five containers were about 2255 meters and the rest about 1x2 meters. Two containers of each size were not yet dug in.

*	Comment. The Cottbus airfield was apparently reoccupied on 1 or 50X1-HUM 2 October 1750 by one bomber regiment equipped with PE-2s. The regiment presumably came from Drewitz since the evacuation of the Drewitz airfield was reported at the same time.
7425 1425	the homber regiment was previously stationed in Drewitz. This indicates 50X1-HUM
<b>የ</b> ትኋ-ጽ	that the regiment was only temporarily transferred to Drewitz.  Comment. The construction of a fuel dump is reported for the first time. The information on the dimensions of the containers indicates that 50X1-HUM the dump has a total capacity of about 135,000 libers.
